- Dimensions: 159x119x55 mm (WxHxD)
- Weight: 4 kg, (including PL-700 Padlock)
- Including: Mounting Material & PowerLock® PL-700 Padlock

Product description

Our newest PowerLock® CTL-Series is the most commonly used anti-theft measurement for trailers and containers. The Type Allock 300 is specially designed to provide maximum security for trailers with swing-shut style doors and containers. The heavy cast iron housing and it's bright red color will discourage any possible break-in.

The Allock 300 is made for right-handed doors. The newest PowerLock® PL-700 padlock, and special mounting material is also included.

The PowerLock® PL-700 padlock is highly durable, sustaining tests such as acetic acid salt-spray, ensuring that it can withstand the elements when used in exposed locations. The PL-700 has superior physical strength which ensures maximum resistance against attacks.

Further security is provided by hardened stainless steel balls locking the boron-shackle on both sides.

Optionally other padlocks which are 70mm wide and have a removable shackle can be fitted inside our CTL-300 such as Abloy PL-358 or Mul-T-Lock C-13.
